

STUDIOYEN.CO

Hello there!

We are super excited to come back for the 31st anniversary of ICFF NYC. This year, we continue to push the limits of Studio Yen's signature design theme, structural patterns, with our strong engineering and fearless design approach, we make inimitable projects come true, such as Storytellers loveseat and ottoman. We explore the potential of mix and match materials to create both interesting visual patterns and physical strength of products. We have also experimented new production methods from trending computational processes to old school slip casting.

Studio Yen is at ICFF NYC booth #2182. Please join us to celebrate our latest work, and we look forward to meeting you soon.

Wish you have a wonderful design week. Cheers!

Sincerely,
Changyen Tsai
